## Connect your life to your home and your security

### The Timeline

Central to the Texecom Connect App experience is the timeline. Both past and programmed events are clearly presented, giving the user instant access to review events that have transpired.

#### Calendar

- See all the events of the day
- Arranged by system status
- Go back and review previous days
- View stored video linked from the calendar or watch a live video stream

#### Rooms & Devices

Devices are allocated to rooms within the Texecom Connect App, which makes locating devices and creating home automation recipes from multiple devices in a room easy and intuitive.

#### Recipes

Recipes are a user-friendly way of describing the programming actions that are used for automation. The Texecom Connect App is programmed on the basis of cause and effect.
